

Increase Your Production Capacity by up to 300%!

Usually such a wild claim would seem too good to be true, but with the right tools and the right manufacturing processes, you can see this kind of increase in your zinc rack plating requirements.

Modern manufacturing is a constant juggle of cost, efficiency, and speed, and zinc-plated parts are no exception. Can you afford **not** to use the fastest, most cost-efficient processes available?

What if you could:

- **Increase** production speed by up to 300%
- **Reduce** lead times by up to 80%
- **Turn** around a large volume order in one day

Increase Production Speed up to Three Times Faster without Sacrificing Quality

Today's manufacturers need higher efficiency and faster lead times. **Saporito Finishing Company's** new fully automated zinc rack plating line delivers. Large volume jobs that used to take 3-5 days we can now turn around in one day. We now offer one of the largest, fastest facilities of its type in the Midwest to industries worldwide. And better yet, it's environmentally friendly, with RoHS compliant, hex-free trivalent chromating. **Saporito Finishing's** commitment to the environment has set the standard in pollution compliance in the Midwest for decades, and has been recognized by a Governor's Award for its environmental compliance in the State of Illinois.

High-Quality Finished Metal Parts for More than 60 Years

Saporito Finishing Company covers the full spectrum of your metal finishing needs.

- Aluminum & Magnesium Anodizing
- Metal Finishing
- Tumbling & Deburring
- Special Finishes
- Trivalent Finishes

The quality, speed, and efficiency of **Saporito Finishing Company's** new zinc rack plating line will exceed your expectations. Put our quality processes to work for you.
